## Minted Client Pipeline

4 signed Minted clients + five 1kx portfolio prospects demonstrating ELE's versatility across the Web3 ecosystem..

---

### 1. Bless.network

**Status:** ELE implementation.

**Category:** Mission-driven community platform (post-Binance airdrop turnaround)

**Timeline:** February

**Why Minted:** Clean, regulated upgrade path after misaligned initial launch. Transform community from donors to equity-aligned stakeholders. Repair tokenomics with NAV-anchored beneficiary environment.

**Value:** Powerful proof-of-concept demonstrating ELE's ability to fix broken tokenomics and realign incentives.

---

### 2. Breakout.app

**Status:** Native Fundraise

**Category:** Crypto consumer credit platform (Alex Masmej, backed by Naval Ravikant)

**Timeline:** March

**Why Minted:** Compliant value-sharing framework for users and borrowers. Ownership-aligned incentives reflecting company fundamentals, not token speculation. Dual-track offering: consumer product + optional ELE participation.

**Value:** Premier consumer fintech flagship demonstrating ELE's versatility beyond ICOs and trading projects.

---

### 3. StandX.com

**Status:** Native Fundraise 1 bil valuation, based on 1bil in per volume weekly.

**Category:** Solana-based stablecoin infrastructure (Solana Foundation grant-backed)

**Timeline:** April

**Why Minted:** Compliant fundraising pathway beyond ecosystem grants. Transition from grant-funded to community-owned growth with equity-aligned upside.

**Value:** Ideal ecosystem-to-market transition client. Demonstrates ELE's versatility for grant-funded teams raising capital.

## Signed Client Revenue Projections

## Key Revenue Drivers

**Success Fees:** 20-25% of raise on Native (where all cost is assumed). Reduced if shared ICO.

**ELE Entry/Exit Fees (2.5% each way):** Recurring revenue as participants enter and exit the equity-aligned environment

**Equity Allocations:** Long-term upside through ELE SPV ownership in high-growth Web3 companies

**Token Allocations:** Additional upside from token supply participation which is vested
